- + The Shaker door is a timeless classic. It has rapidly become the most popular cabinet style in America. It has a clean look that works in contemporary, traditional or transitional designs.
- + The Shaker door is made from rich natural wood and is available in two stains: Coast and Kona as well as three paints: White, Mist and Storm. It is full overlay and a part of our full access framed cabinet line which includes full backs on base and uppers, wood interiors and solid wood dovetail drawers with full extension undermount soft close drawers and hinges.
- + Shaker cabinets are often stained to bring out the natural wood hues in darker colors or painted in white or gray which are most prevalent in modern kitchens as they give off a light and inviting feel that many contemporary or transitional designs pursue.
- + Our Shaker door in White and Coast Grey stain has quickly become our most popular style and best seller. With its clean crisp lines and wide selection of colors to choose from, the Shaker door is a favorite choice of designers and homeowners.
